VALUES

*Priority to customers
Commitment to Quality
Respect towards our personnel
Innovation
Efficiency*

Mission Vision

SOFIKITIS Poolstones mission is to manufacture and supply distinctively different products, offering leading edge results and innovative solutions to customers, ultimately, maximizing their satisfaction.

Over time, SOFIKITIS Poolstones has managed to establish itself as an innovating, efficient and reliable manufacturer of decorative natural stones for swimming pools and, thus to obtain a recognizable brand name, among the swimming pool industry.

Therefore, our vision is to continue the 12 years outstanding progress, as manufacturers in the field of decorative natural stones in-and-around the pool. Full customer's satisfaction, continuous research and development of our range of products remain as the most important dimensions of the corporate vision.

Why SOFIKITIS Poolstones?

SOFIKITIS Poolstones 38-year experience and tradition in natural decorative stones processing, as well as the internationally recognized brand have highly contributed to our tremendous growth. Having as distinguishing elements the innovation, the expertise, the modern equipment, the customer-oriented philosophy and the well-trained manpower we seek to further raise the standards in the swimming pool industry.

In this ever-changing industry, we, at SOFIKITIS Poolstones, have managed to remain committed to the values that have distinguished us as the premier leader in the swimming pool accessories industry. Values such as commitment to quality, innovation, efficiency and respect towards our personnel have been fundamental to our effort to achieve full customer satisfaction and upon them our corporate identity has been built.

MODULAR DRAIN GRATE

Having as distinguishing elements the innovation, the expertise, the modern equipment, the customer-oriented philosophy and the well- trained manpower we seek to further raise the standards in the swimming pool industry.

Based on this philosophy, modular drain grates have been designed and manufactured in order to be easily installed almost in every channel, no matter if it is new or old.

SOLVING PROBLEMS

Through the years and while using the pool ,despite having read instructions for proper use and maintenance of the decorative stones, several accidents are likely to occur , such as , breakage of the grate when removing from the channel , or staining , or damage from negligent pool care.

The company keeps two years digital record, with details of the customer's order, as well as color sample with regards to exact repetition of pool parts. Further to the two years period, the file is destroyed, unless the customer asks to be kept up to 20 years, by paying a very low fee.

Walk-resistance measuring machine

Poolstones by Sofikitis products, can be accompanied by laboratory test results regarding their:

- Slip resistance
- Flexural strength
- Water drain capacity (applies to grates)
- Walk-resistance

work-in-process tracking system

Marble grate drainage testing machine

Laboratory flexural testing machine

STORE TECHNICAL SPECIFICATIONS

Every project is approached with the idea of prioritising product quality and optimal installation to ensure that functionality is achieved.

By infusing our projects with "green" products and practices we remain focused on our commitment for environmental accountability.

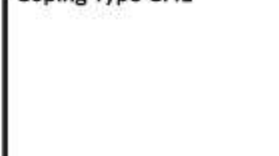

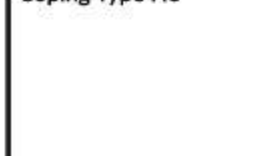

Whether you are considering an addition, remodel or creating a custom project, it requires proper planning and a touch of inspiration. Let us help you build your dream project.

- * Marble is a natural product, therefore color variations are to be expected.
- * Waterproof treatment is highly recommended for all natural stones. The client shall be liable for the cost and the supervision of the process.
- * Dimensions, quantities and treatments were made on the basis of the customer's suggestions and should be confirmed to begin manufacturing.
- * Additional quantities, work & processom the offered are agreed only in writing.
- * Adhesive is recommended for the installation of the products since mud is likely to cause various stains including salts stains.
- * When using an epoxy grout, make sure to clean it immediately after use.
- * In order to prevent marble pool products' erosion:
 - ~ Pool's water should be kept within a pH level of 7.2 to 7.6 throughout the day
 - ~ The level of the pool water's total alkalinity should be between 80ppm and 140 ppm
 - ~ The chlorine levels should be lower than 5ppm
 - ~ Before using chemical products in the pool channels, make sure to remove the drain grates first
